

The global AI server market size was calculated at USD 30.74 billion in 2024 and is expected to reach around USD 352.28 billion by 2034, with a CAGR of 27.62%.

North American CSPs' continued investments in AI infrastructure are expected to increase global AI server shipments by more than 28% YoY in 2026, according to the latest market ...

Global shipments of AI servers are projected to increase significantly by 2026, driven by rising inference workloads, cloud investments, and the adoption of custom silicon.

The AI server market was valued at USD 128 billion in 2024 and is expected to grow at a CAGR of 28.2% between 2025 and 2034, driven by the explosive enterprise AI adoption and proven return on ...

The rapid growth of AI inference services is boosting demand for general-purpose servers, supporting both replacement and expansion efforts. Consequently, TrendForce predicts that ...

Global AI server shipments are expected to reach 1.81 million units in 2025, with high-end models no longer concentrated among the four major US CSPs.

In 2026, with GPU vendors pushing integrated rack-level systems and CSPs expanding investments in ASIC-based AI infrastructure, AI server revenue is projected to grow by more than ...

The rapid growth of AI inference services is boosting demand for general-purpose servers, supporting both replacement and expansion efforts. ...

This has pushed lead times from 11-16 weeks to 21-26 weeks. On the AI server side, strong demand from CSPs (cloud service providers) is expected to drive shipment growth of ...

Global shipments of AI servers are projected to increase at a CAGR of 27.2% during 2022-2027. By 2027, AI servers are forecasted to account for around 19% of the total annual server shipments.
