

The Andor HoloSpec is the ideal solution for collecting more light and achieving better signal-to-noise ratio faster, which is critical for applications such as micro-Raman mapping, microfluidics, real-time ...

Andor's range of highly versatile spectrographs provide high resolution, high throughput, high modularity, ease of use from the UV to the NIR and SWIR, from macro- to nano-scale, with fluxes down to single ...

Andor Technology Ltd is a global developer and manufacturer of scientific cameras, microscopy systems and spectrographs for academic, government, and industrial applications.

Oxford Instruments Andor is a leader in scientific imaging and spectroscopy. The company develops and manufactures products that support global customers. Using Andor products these customers can ...

Andor Technology, plc is a world leader in the manufacturing of high performance VUV to SWIR modular spectroscopy detection solutions.

Discover the spectrometer product range of OXFORD ANDOR. Contact the manufacturer directly.

Andor is a world leader in design and manufacture of high-performance EMCCD, sCMOS and CCD cameras, microscopy systems, spectrographs, and optical cryostats.

The Andor Shamrock 500i imaging spectrometer is the latest addition of the Andor family of spectrometers based on Czerny-Turner optical design. The optimized optical design provides ...

Andor has been taking pride in helping researchers around the world achieve breakthrough discoveries for the last 28 years. By keeping at the forefront of detector technology, Andor is able to offer a range ...
