

Consider these popular solutions in industrial sensing, control, connectivity, and more, including cost-effective options from RS PRO. Our Better World product range empowers sustainable ...

Arista supports a full range of 400G optical transceivers, Active Optical Cables (AOCs) and Direct Attach Copper cables (DACs) in both OSFP and QSFP-DD form factors.

Learn how Cisco 400G QSFP-DD High-Power (Bright) Optical module's small size and low power make it an optimal choice for a wide range of ...

Corning's next-gen CPO optical network switches deliver speed and reduce latency leveraged by industry-leading expertise for optimized on-board connectivity.

Quad Small Form-factor Pluggable Double Density (QSFP-DD) solution that fits into high-density switch and router client ports for optical interconnect links

Our 400G optical transceivers are 100% compatible with leading OEM brands such as Cisco, Juniper, Arista, Huawei, Nokia, Dell, and more. This ...

Equipment and electrical serdes can evolve through 3 generations (25 Gb/s, 50 Gb/s or 100 Gb/s) without changing the optical interface that interconnects your equipment.

The 400g SFP modules produced by SULITON are suitable for most switch brands on the market, such as MSA, Cisco, Huawei, Juniper, Dell, Edge-Core and other switches.

Our 400G optical transceivers are 100% compatible with leading OEM brands such as Cisco, Juniper, Arista, Huawei, Nokia, Dell, and more. This means you get the same performance ...

Learn how Cisco 400G QSFP-DD High-Power (Bright) Optical module's small size and low power make it an optimal choice for a wide range of DCI/Cloud, metro access/aggregation, ...

Together, the 400G/lane optical DSP and 400G EML/PD enable optical module manufacturers to deliver cost-effective, low-power 1.6T transceivers. More importantly, this ...

The OSFP port uses 8x 50G PAM4 modulation and can be used with 400G switches, while the QSFP28 port uses 4x 25G NRZ modulation and can be used with 100G switches or network cards.

The 400G QSFP-DD to 2x 200G QSFP56 breakout active optical cables operate over multi-mode fibers

(MMF). This breakout cable is compliant with IEEE 802.3, QSFP-DD MSA, SFF-8024, SFF-8679, ...
