Belarusian designers, in parallel with the process of upgrading and modernizing of BTR-70s, had an idea of creating an indigenous BTR in collaboration with Russia. This was the initiative of MZKT in a period of 2008-2010. The vehicle received index MZKT-590100 "Umka". However work has then stalled, as no government contract was signed, and suggestions towards State Military-Industrial Committee for development of government program failed. Umka project did not receive the support and funds of eith...
