

With over 2,700 miles of active installation, California remains ahead of schedule to deliver about 8,000 miles of broadband fiber, enabling more affordable and reliable broadband ...

Frontier is working hard to construct a fiber network in your area as quickly as possible. Learn about the construction process and how it may impact you.

In July 2016, the Commission approved the installation of a fiber optic cable offshore of Hermosa Beach in Los Angeles County and the construction of two landing sites in Hermosa Beach with a total ...

Local leaders and state officials gathered in Compton to celebrate the ambitious initiative, which aims to connect every city hall in the region with dual-path fiber optic cable for redundancy, ...

You can use this map to review and report broadband speeds and look up information about available broadband services.

CALIFORNIA Interactive Broadband Map ... Interactive Broadband Map Data as of December 31st, 2024
HOW-TO Use the Map USER GUIDE

The map will be updated continuously to improve its accuracy through a combination of FCC verification efforts, new data from Internet providers, updates to the location data, and--importantly--information ...

Explore our comprehensive global network, including fiber, on-net, data center and edge locations spanning 5 continents.

AB965 provides for batch processing by local governments of wireless and related infrastructure (read, for this purpose, fiber cable). Briefly, the law permits ...

The Applicant proposes to install the landing infrastructure (e.g., BMHs, bore pipes) in one phase, with cable (s) installation occurring in a subsequent phase based on planning timelines, ...

Fiber optic cable sequential numbers are required at each pole location and vault wall. Sequential numbers will identify conduit length, and slack left in vaults and at poles.

Get the length you need, run it from the box outside or from the wall plate inside to wherever you need. It's fiber - don't worry about distance in your home use case, but avoid extreme bends or additional ...

This project involved the comprehensive relocation of all above-ground low voltage and high voltage

electrical lines, as well as fiber optic cables, to underground installations.
