

24 Core Fiber Distribution Box SC PLC Splitter 1&#215;16 FDB-24C-1, known as optical Distribution box (ODB) as well, is a compact fiber management product of small size.

Designed for use on Rollable or Spyder type ribbon fiber optic cables, this tool is perfect for separating the matrix of fibers in ribbon fiber optic cables quickly and easily. This tool also features the following:

24 Core Fiber Distribution Box SC PLC Splitter 1&#215;16 FDB-24C-1, ...

Clamping for feeder cable and drop cable, fiber splicing, fixation, storage, distribution...etc all in one. Cable, pigtails, patch cords are running through own path without disturbing each other, cassette type ...

These devices enable more effective monitoring and management of optical networks. They are available as components, in our quick connect cassettes, or in custom modules and rack-mount ...

Designed for use on Rollable or Spyder type ribbon fiber optic cables, this tool is ...

Ribbons contain multiple, individually colored, 250 &#181;m optical fibers arranged in a flat linear matrix encapsulated by an UV cured polymer material. The 24-fiber ribbon is emerging as the most popular ...

The FDB is made of high strength materials, UV resistance, waterproof, maximum capacity up to 24 cores, with perfect space design, a variety of PLC splitter can be installed, it can be used in indoor ...

Small size, reasonable design for cable protection. Material: PP plastic for base and cover; ABS plastic for inside parts. 4 Cable ports (2 in 2 out) for max. 12mm diameter optical cable entry & exit. 24 fi ...

SP-1606-24E Terminal Box is made of high-quality ABS Plastic material. It's mainly used for indoor wall-mounted installation. Box cover with locks prevent illegal open the box itable for fiber optic ...

Description This outdoor 24 ports fiber distribution box provides a protected termination point for feeder cable to connect with drop cable in FTTH and FTTx communication networks. It integrates optical ...

CommScope's Optical Splitter Modules are part of our value-added module (VAM) system that provides flexibility, scalability and functionality to an optical transport system.
