

There are methods using robots to install fiber optic cable in storm sewers or other underground pipes. They have been used in center cities where construction is difficult but not widely.

CDP also has significant potential to enable technologies requiring high-speed communications ("smart" drilling technologies) through the drill pipe via the ...

Using fully automated equipment we can offer you light pipes at prices just above those of the raw material itself. In addition, you will find the pre-cut lengths to have high quality end polishes and very ...

Composite drill pipe consists of a composite material tube with standard drill pipe steel box and pin connections. Unlike metal drill pipe, ...

Significant potential exists to enable technologies requiring high-speed communications and data transfer ("smart" drilling technologies) through the composite drill pipe via embedded cables and/or ...

CDP also has significant potential to enable technologies requiring high- embedding of cables and/or fiber optic leads within the body of the drill pipe.

CDP also has significant potential to enable technologies requiring high-speed communications ("smart" drilling technologies) through the drill pipe via the embedding of cables and/or fiber optic leads within ...

CommScope designs and manufactures a comprehensive line of fiber optic cables--from outside plant to indoor/outdoor and fire-rated indoor fiber cables.

Composite drill pipe consists of a composite material tube with standard drill pipe steel box and pin connections. Unlike metal drill pipe, composite drill pipe can be easily designed, ordered, ...

This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status ...

TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations.

When constructing ground-buried optical cable and communication cable systems, the best solution is to ensure the long-term protection of the cables with rigid plastic conduits.
