

Cable trays for fire protection and high-voltage electrical systems

Our 4-hour fire rated cable encasements provide comprehensive fire and blast protection, shielding cables from fire and containing high voltage cable fires

Unifrax's FyreWrap® Cable Insulation is a thin, flexible, insulation wrap designed to provide a fire-protective enclosure around cable trays and conduit.

Use this product in new construction or update your fire protection in a renovation - the optional mounting bracket opens easily allowing retrofit installations.

Cable trays are a part of a planned cable management system to support, route, protect and provide a pathway for cable systems. Cable trays support cables across open spans in the same way that ...

Boost your electrical needs with our Fire Rated Cable Trays that are tested for fire resistance under real-world conditions. Designed to perform even with cables installed and connected.

FireResistant Solutions provides cable tray covering and fire-protection systems designed to safeguard electrical and data infrastructure in commercial and multifamily buildings.

Explore the importance of fire-resistant cable trays in high-risk environments. Learn about the best materials and practices to ensure maximum safety and performance in fire-sensitive areas.

Installation: FireMaster Cable Wrap shall be installed by a qualified contractor in strict accordance with Morgan Advanced Materials installation instructions and certification requirements.

Technical guide to firestopping cable tray and slab penetrations in electrical shafts; specifies materials, packing limits, waterstop heights and installation sequence.

Technical guide to firestopping cable tray and slab penetrations in electrical shafts; specifies materials, packing limits, waterstop heights and ...

Our cable tray systems securely hold and protect cables and come in many models and sizes, solid bottom and ventilated.
