

Cold bending equipment for distribution boxes

Leveraging its strategic location, advanced manufacturing ecosystem, and robust technical resources, TradeTook specializes in the R& D, manufacturing, and sales of roll forming equipment.

Find your cold bending machine easily amongst the 39 products from the leading brands (MACKMA, NUMALLIANCE, Ercolina, ...) on DirectIndustry, the industry specialist for your professional purchases.

In cold forming and bending processes, various equipment is employed to achieve precise and efficient results. Key machines include mandrel benders for pipes and tubes, press brakes for ...

Explore our many specialized and optimized sheet metal machines for Bending, Cutting, and Forming. Built to bring you cost and time savings.

Whether you need a single roll forming machine or an entire manufacturing system, The Bradbury Group has the expertise, experience, and commitment to build equipment that will exceed ...

With over 8000 machines in the field, Metalforming is the largest sheet metal folding and forming equipment distributor of metal folding machines in North America.

The main features of the distribution box roller forming machine include a high degree of automation and precise control, which can adjust the size and shape of the box according to different production ...

Cold Bending Machines: These machines bend pipes at room temperature, using rollers or dies to form the desired curve. They are suitable for most types of pipes and tubes and offer a cost ...

Under the frictional damping action of the forming roller and pressure roller, after entering the bending part at a linear speed of 0-13m, the box is cut and bent as required, and then manually packed away.

Videx is offering lines of single or multiple-die Hand-Feed Cold Formers. The machines are designed for the production of small and medium-sized batches of Long Headed, Shouldered, or Extruded parts ...
