

All line cards and switch fabric modules adopt the orthogonal architecture. Cross-line card traffic is transmitted to switch fabric modules through orthogonal connectors, with low transmission loss. This ...

Based on an x86 CPU, the Cisco Catalyst 9500 Series is Cisco's lead purpose-built fixed core and aggregation enterprise switching platform, built for security, IoT, and cloud. The switches ...

This advanced modular 4U chassis switch offers performance up to 960 Gbps with low latency, six half-width line card slots with line rate up to 64 bytes, and up to 90 W Smart Rate 10 GbE ...

HPE Aruba Networking CX 6400 Switch Series offers modular, high-capacity switching with advanced resiliency, and scalability for enterprise core and aggregation layers.

The Aruba CX 6400 Switch Series is a modern, flexible and intelligent family of modular switches ideal for access, aggregation and core in enterprise campus and data center deployments.

Search Newegg for core switch. Get fast shipping and top-rated customer service.

The Juniper Networks EX9200 line of modular Ethernet switches provides a programmable, flexible, and scalable core for delivering mission critical applications in both campus and data center ...

CloudEngine S16700 series switches are flagship core switches with record-high performance designed for high-quality 10 Gbps campus networks. This series stands out for ultra-fast forwarding capability ...

It provides up to 19.2 Tbps of switching capacity based on a fully resilient design that includes redundant fabric, management, power and fans to create a resilient, highly available network that is ideal for the ...

The Cisco Catalyst 9400 Series switches are Cisco's leading modular enterprise switching access, distribution and core platform built for security, IoT and cloud.
