

Siemens" universal protection relays portfolio includes products such as SIPROTEC 7SX800 and 7SX85 to provide flexibility and cost savings. Our devices cover a wide range of ...

This advanced relay safeguards against undercurrent, overcurrent, and current asymmetry, ensuring optimal performance and protection for motors, UPS supplies, transformers, ...

Electronic residual current protection relay with built-in 28 mm transformer, forming a single unit. Super-immunised type-A, with high-frequency current filtering and high immunity.

Specifically designed for electrical distribution and sub-transmission line systems. The DPU2000R offers unique protective, monitoring, metering, programmable control, and communications features for ...

Protect critical components in your power system with a wide range of SEL protective relays covering applications and use cases from low to high-voltage protection.

Selec Digital Current Protection Relay safeguards against over/under current & asymmetry. LCD display aids fault identification swiftly. Single & three phase models available.

Eaton"s protective relays provide you with unique microprocessor-based devices that eliminate unnecessary trips, isolate faults, protect motors and breakers, and provide system information to help ...

Relays may be fitted with a "target" or "flag" unit, which is released when the relay operates, to display a distinctive colored signal when the relay has tripped.

Protective relays and devices have been developed over 100 years ago to provide "lastline"of defense for the electrical systems. They are intended to quickly identify a fault and isolate it so the balance of ...

Trip unit architecture first evolved beyond thermal magnetic overcurrent protection to systems consisting of current sensors, adjustable dial settings, and the introduction of additional ...
