

RPMC Lasers, with the support of Jenoptik, was able to customize the laser diode bar design for the specific wavelengths needed and to improve efficiency and the cavity length and emitter design to ...

We design and manufacture OEM laser diode modules tailored to your application requirements. Custom laser modules for every requirement.

Designing an effective laser diode collimator requires understanding the unique optical properties of diode emission and choosing the right lens type and specifications.

ALTER's laser diode modules: Custom configurations, in-house assembly/testing, and precision solutions for diverse Photonics applications.

When a laser is precisely matched to its environment, its interaction with other components is significantly more stable. By developing a custom diode laser specifically for the application, ...

Custom laser diode module designs for precision and tailored solutions. Explore innovative options for your specific needs.

Custom Services available are: wavelength sorting, consulting, R& D, design work, & manufacturing of your product. US-Lasers, Inc., also offers other major manufacturers' laser diodes i.e., Samsung, ...

Get Quotations on your custom Laser Diode requirement from multiple manufacturers via GoPhotonics. Enter your requirements, details and upload any supporting files.

Each semiconductor laser diode module is ordered with or without Blue Sky's patented π -Lens(TM) correction optics. Systems with π -Lens(TM) will have near perfect Gaussian and circular beam shapes ...

Efficiently utilizing our host of great laser diodes, customizing the casings, addressing power sources and finally manufacturing the prototype (as necessary) for perfect assembly within larger projects. ...
