

Customized LED Power Meter Chips in Belgium

These compact 3-phase power meters measure up to 16 parameters to help to monitor, optimize energy usage, power quality, equipment performance, and sub-billing.

We supply printed-circuit boards and electronic custom-made work to various sectors such as infrastructure, automotive, healthcare, agriculture, food and the banking sector.

Farnell België - De snelle en betrouwbare distributeur van producten en technologie voor het industrieel ontwerpen, onderhouden en repareren. De juiste componenten voor het succes van morgen.

Our ICs for smart power meters feature the widest dynamic range in the industry as well as extremely high accuracy, helping to improve the performance of smart meters.

Our services extend to custom packaging and the optoelectrical categorization of products, providing unique advantages. We empower designers with the knowledge to select custom modifications that ...

Our power metering products offer high accuracy and reliable measurements of voltage, current, and power, allowing you to monitor ...

Our power metering products offer high accuracy and reliable measurements of voltage, current, and power, allowing you to monitor and control your energy usage with precision.

Electricity meter solutions that accurately measure energy consumption for fair billing in residential, commercial and industrial applications.

IC-Link provides customized solutions for innovative chip manufacturing, built on imec's semiconductor expertise. Next to silicon production, the division includes services spanning from design through ...

We translate your invention, idea or sketch into the required PCB layout and electronic diagrams. We procure and stock all parts and electronic components that, according to the bill of materials, are ...

We provide cost-effective, pin-to-pin BOM replacement solutions for single-phase, three-phase, industrial and IoT smart meters.
