

Customized Original Fiber Optic Sensors from Azerbaijan

Recognized as a leading developer and manufacturer of fiber optic temperature sensing and partial discharge monitoring products, providing solutions for a multitude of industrial applications.

This document contains a guide for configuring glass fiber-optic cables for individual application scenarios. Fiber-optic sensors are ideal for detecting small parts. They use plastic or glass fiber-optic ...

Our state-of-the art facilities allow for small order quantities of customized sensor solutions as well as high-volume manufacturing with our fully-automated production plants.

Particularly effective for high-precision detection scenarios, it combines flexible customization, exceptional compatibility, and enhanced reliability with the convenience of an elbow-mounted design.

A variety of optical sensing technologies has been developed over the years and are now readily available on the market. Among these are truly distributed sensors based on Rayleigh, Raman, and ...

Fiber optic solutions for industrial applications: temperature, pressure, displacement, strain by Opsens Solutions. Contact us.

Azbil fiber optic photoelectric sensors provide easy operation and high performance for a variety of applications.

Our custom fiber optic solutions are proven worldwide in demanding fields, ranging from industrial laser processing and medical imaging to advanced spectroscopy.

IDIL manufactures single FBG sensors and FBG array sensors for continuous monitoring of temperature, strain, and various physical and chemical parameters. Optimized for industrial and ...

Somni Solutions specialises in the design and manufacturing of innovative high performance fiber optic sensors. These sensors use fiber optic technology to measure various parameters such as ...
