

I've got my gear spread out in 4-8 space rack cases. I don't want to take up a space in every rack with a power conditioner, but I want the convenience of one plug per rack.

Comprehensive guide to designing, calculating loads, building, and ensuring code compliance for your DIY power distribution system.

For starters, I built a rack for my truck to throw some "off road" lights on. I wanted a box to control these and some reverse lights. I also got an old remote starter from my dad that happened to have some ...

I have a few 12V 2A DC devices such as this one. Right now I'm using a PoE to 12V PD adapter like this one to drive them. But I'm looking to move them into a new rack and it's getting kinda bulky with ...

Music: Ask The Ocean - Thoughts About In this video we will build a professional power distribution box in a 2U rack chassis, it will have 8 Schuko sockets and a switch for each outlet and a...

Build your Custom Rack Power Distribution System for your specific data center needs to help optimize power, energy, and cost.

This video is giving you a step by step illustration of making the Power Distribution Box (Distro Box). It demonstrates how to do electrical wiring of the box in a simplistic and...

This was a satisfying project that showcases a modern, efficient way to build a custom distribution box. But I will say it one last time: safety first. If you have even the slightest doubt, please ...

This was a satisfying project that showcases a modern, efficient way to build a custom distribution box. But I will say it one last time: safety first. If you ...

It doesn't support LiFePo4 chemistry right out of the box, but it's an interesting and unique design that I'm likely to use in the future for charging my home-built battery pack.

Just clean and simple power distribution. I'd like to build a 10-outlet box using five Hubbell HBL5362 duplex receptacles. One of them will be un-switched, or possibly have a separate switch. ...
