

The report: " Data Center Rack Market - Forecast (2020-2025)", by IndustryARC covers an in-depth analysis of the following segments of the Data Center Rack market.

This article explains the reasons behind the recent increase in density per rack. Read on to learn what is causing this trend and what steps data centers will have to make to remain competitive.

The average server rack density has nearly quadrupled in the past nine years, from 2.4kW/rack in 2011 and 5.6kW/rack in 2017 to 8.4kW/rack in 2020, according to the 10th annual Uptime Institute Global ...

Using CloudScene1 data, this EBOT looks at the global trends for data storage and processing, with a closer look at the global and U.S. data center markets. It will also briefly note some of the policy ...

With changing technologies and adoption of high-density servers, rack infrastructure has become a crucial aspect in the data centers, with the need to effectively host servers, manage cables,...

The 2020 State of the Data Center report found that the average rack density increased by nearly an entire kilowatt (kW) from the previous year, jumping to 8.2 kW per rack, up from 7.3 kW ...

The total data center rack market size is expected to grow from USD 3,771 million in 2020 to USD 5,904 million by 2025, at a Compound Annual Growth Rate (CAGR) of 9.4% during ...

The growing number of colocation facilities across the globe coupled with the increasing server density are forcing data facilities to implement taller, deeper, and wider racks.

The U.S. Data Center Racks Market size was valued at USD 914.36 million in 2020 to USD 1,535.32 million in 2025 and is anticipated to reach USD 3,502.94 million by 2035, at a CAGR of 8.55% during ...

o PowerPass Distribution Module allows a step-down voltage to 120V to accommodate a variety of IT equipment. The PPDM also provides a maintenance bypass, which allows you to service or replace ...
