

Direct Sales of Fiber Optic Sensors for Drilling Rigs

We custom design a downhole fiber optic connectors suitable for use in the extreme temperature and pressure environments of a the oil & gas industries.

At Halliburton, we simplified fiber installation by engineering out unnecessary complexity and cost for a more practical fracture monitoring solution that complements your well factory approach.

Fiber optic instrumentation designed for downhole monitoring and mining projects. To meet the challenges of demanding conditions related to geotechnical applications, Opsens Solutions designed ...

Fiber Optic monitoring solutions backed by knowledgeable advice, detailed project planning, and successful installation. As we often say, you can't manage what you dont measure.

Due to SageRider's broad knowledge base in both fiber optic sensing technology and oilfield services, we are well suited for the engineering and operational demands of the industry.

After an assessment of the project requirements, Weatherford experts proposed an in-country, fiber optic monitoring system with a proven record of reliability and backed by data from a gas well completion ...

Our technical sales specialists are ready to assist you in choosing the system that will be a proper fit for your application and budget. Well inspection cameras are special cameras used to inspect deep ...

Shop fiber optic sensors at AutomationDirect. Your source for high quality Photo Sensors, Fiber Optic Sensors and Cutable Optic Fibers at low prices.

Explore how fiber optic sensing is transforming downhole monitoring for safer, more efficient oil and gas operations.

Discover our elite selection of high-accuracy Fiber Optic Gyroscopes engineered specifically to withstand the intense shock, vibration, and temperature fluctuations characteristic of the mining and ...
