

Our distribution boxes are perfect for industrial environments, catering to automation, robotics, and processing facilities. They provide cost-effective solutions through automated dispensing and ...

They can be assembled into a complete set of distribution boxes as line overload and short circuit protection, and can be used for temporary power distribution.

Understand distribution boxes (DB boxes) in 5 minutes. Learn about types, components, functions, and uses. Find the perfect DB box for your needs.

XXM type distribution box is suitable for terminal distribution box system, and its cabinet body is manufactured by full CNC assembly process, with beautiful appearance and high protection level; It ...

XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc.

XXM low-voltage lighting distribution box is suitable for single-phase and three-phase circuits with frequency of 50Hz, rated voltage below 400V, and load current not more than 100A.

The XXM series lighting and power control distribution boxes are available in three variants: universal type, outdoor type, and transparent window type. They can be designed for either surface-mounted ...
