

Do I still need a router if I have fiber optic internet installed

Discover the essential equipment needed for fiber-optic internet, including modems, routers, Ethernet cables and more. Learn how to optimize your setup.

Do I need special equipment for fiber internet installation? Yes, fiber internet requires specific equipment including an Optical Network Terminal (ONT) and a compatible router.

Wondering if you can use your own router for fiber internet? Learn about compatibility, setup tips and what to consider before replacing your equipment.

In contrast to the modem situation, any router can work with a fiber connection. That's no exaggeration, either--if it has an Ethernet port (and nearly every modern router does), you can ...

In summary, while fiber optic internet is a wired technology, your fiber service package in 2025 almost invariably includes the necessary equipment - typically an ONT and a Wi-Fi router - to create a ...

The short answer is no, you don't necessarily need a special router for fiber optic internet. However, having a router that is optimized for fiber optic internet can make a big difference ...

You don't need a special router, per se, but you do need one that can handle the speed fiber provides. If you're paying for gigabit fiber service, make sure your router supports at least ...

You still need a router: The ONT converts the fiber signal but doesn't distribute Wi-Fi. You need a router connected to the ONT to get wireless coverage throughout your home -- either a ...

While the ONT is necessary for converting the fiber optic signal, you will still need a router to distribute the internet connection to multiple devices within your home or business.

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Your router works hand-in-hand with the ONT, taking the internet signal and spreading ...
