

# Does the X520 not support Huawei optical modules

SFP+ optical module, SFP module, and direct attach cable requirements for the Intel®; Ethernet Converged Network Adapter X520 Series.

Are you paying Intel an ongoing subscription to keep it working, or are you getting "this device is too old" in from the ixgbe driver mainline Linux Kernel? I don't expect the initialisation code ...

Figure 3 shows the Intel X520 Dual Port 10GbE SFP+ Embedded Adapter. This form factor is designed to fit into a special slot in selected servers (see Table 4), allowing you to use the regular PCIe slots ...

Intel's X520, X550, and X710 series cards are widely supported across the major operating systems, like Windows, Linux, and FreeBSD, but ...

Check whether the optical module is Huawei-certified. If it is not certified by Huawei, replace it with a Huawei certified one. Remove and reinstall the optical module. If this resolves the ...

The X520 adapters offer FCoE hardware acceleration to provide performance comparable to FC HBAs. The adapters support Data Center Bridging, also known as Converged Enhanced Ethernet (CEE), ...

It's mostly compatible with any kind of a transceiver. If something goes wrong, you can easily patch the driver itself to support everything. I may write a small blog post how to do that. Got around 4 x520 ...

Intel's X520, X550, and X710 series cards are widely supported across the major operating systems, like Windows, Linux, and FreeBSD, but ensuring the correct drivers are installed ...

Card is already unlocked for all SFP modules. Nothing to do.

x520-da1 in windows computer+10g optical module-----rb5009 + 10g Optical Module NOT work. (no matter set to 10g Full-Duplex or not)

Are Optical Modules of Huawei Switches Interchangeable with Optical Modules of Other Manufacturers? No. Huawei S switches must use Huawei-certified S switch optical modules.
