

ZHERUTONG is a professional high voltage enclosed busway and bus duct manufacturer, offering common enclosure busbar systems up to 35kV and 5000A+. Widely used in power plants, ...

The enclosure of the HD-GFM three-phase common box enclosed busbar system is made of aluminum alloy or weak magnetic steel plate (stainless steel), and the internal conductors are rectangular or ...

The 35kV copper busbar cable branching box is a high-voltage distribution device used in urban grid cable modification projects.

High voltage common box enclosed busduct system with 10KV 35KV capacity and IP54 IP66 protection for safe and reliable power distribution.

GFGM series common box closed insulated tubular bus (3-35kV/ 1600-8000A) is a new type of closed insulated tubular bus developed and produced by our company according to the market demand.

Application Main busbar connector box in the electrical equipment at the electrical connection of the insulation protection. This product is engineered to withstand extreme heat, ensuring that high and ...

The arrangement of busbars in this enclosure can be tailored, allowing a variety of configurations suitable for inflexible, higher-current carrying cables. These are housed within a 316L (1.404) ...

The shell of the JHGC three-phase common box enclosed busbar system is made of aluminum alloy or weak magnetic steel plate (stainless steel). The internal conductor is a rectangular or slotted busbar ...

GFM series high voltage common box enclosed busbar (3-35kv / 250A ~ 4000A) was developed by our company in the late 1980s according to the market requirements.

Robust HV busbar and enclosed busbar solutions up to 35kV, designed for substations, mining, and offshore platforms. Dust-proof, moisture-resistant, and compliant with IEC/ANSI standards.
