

These testers work with various relay types, including overcurrent relays, distance relays, and differential relays. They can test both traditional electromagnetic relays and modern digital relays.

Find your protection relay testing device easily amongst the 72 products from the leading brands (MEGGER, OMICRON, WUHV, ...) on DirectIndustry, the industry specialist for your professional ...

With its large, full colour, high resolution, TFT LCD touch screen, it allows you to perform manual, steady-state, and dynamic testing quickly and easily using the manual test screen, as well as using ...

TEST-630 protection relay tester is a relay test equipment which offers all the characteristics and functions needed for protective relay testing, in a manual or automatic mode, designed for using on ...

It can complete most of the field test and verification work, can verify various relays and microcomputer protections, and can simulate various complex transient, permanent, and conversion faults for a ...

Individual test programs for each type of protection relay are needed, but the interface used is standard for all protection relay types. Control of input waveforms and analogue measurements, the ...

Through protection testing, the performance and reliability of relay protection devices can be comprehensively verified, ensuring their correct operation in actual scenarios.

Battery testers and custom electronics. We can help you to develop and produce power control and testing electronics.

Combined with the immense functional range, our testing software also gives you the necessary flexibility to test protection relays and other secondary assets in detail.
