

This space is dedicated to promoting the EU's approach to AI and the strategic initiatives that aim to harness the untapped potential of European researchers and industries.

European OEMs are leveraging the demand for sovereign and sustainable AI compute by developing specialized AI server platforms: Eviden, part of the Atos Group, supplies energy-efficient AI server ...

Based on server type, the AI inference servers segment dominated the Europe AI server market and accounted for a 48.1% share in 2024, driven by increasing deployment in real-time AI ...

From AI supercomputing to secure networking and hybrid cloud infrastructure, our enterprise-grade product portfolio powers some of the most ambitious organizations on the planet, in industries ...

This guide covers how to choose between GPU and CPU inference, what hardware each approach needs, and how to serve AI models in production on a GDPR-compliant EU cloud server.

The increasing adoption of generative AI, large language models, and edge AI applications is fueling demand for high-compute capacity servers in Europe. Major technology ...

Discover top-tier dedicated and virtual server rental for AI & machine learning with GPUs for neural network training. Custom configurations and free setup. Rent servers In Europe.

Explore top AI servers with NVIDIA H100 and A100 GPUs. Dell, HPE, Lenovo, and Supermicro systems built for HPC, deep learning, and enterprise AI.

From London's Gen AI startups to Germany's industrial automation specialists, this ecosystem has turned what others see as constraints into competitive advantages.

Discover and explore European AI companies and services across different categories.
