

It is used for high-precision inspection of fiber connector end faces in labs, production lines, and field maintenance, ensuring polishing quality and cleanliness.

Increasing deployment of optical fiber networks and the need for reliable high bandwidth make the task of inspecting optical fiber connector end faces a crucial process that must not be ...

The GL16 Interferometer provides all the necessary components for fiber end face geometry measurement integrated into a compact housing with a 7" capacitive touch-screen display for local ...

Fiber optics is generally quite sensitive; tiny defects and even low levels of contamination on fiber endfaces can substantially degrade device and system performance.

In order to ensure good fibre-to-fibre contact, the endface geometry of fibre connectors needs to be measured quantitatively. In this paper, we present a vision-based automatic ...

The method can be used to detect defects such as oil, dust, impurities, dents, and scratches on fiber optic end faces. The experimental results show that the POL detection method has ...

Increasing deployment of optical fiber networks and the need for reliable high bandwidth make the task of inspecting optical fiber connector end ...

The Fiber Chek Software determines pass or fail is based on the number of scratches and defects found in each measurement region of the fiber end-face, including the core, cladding, adhesive layer and ...

Automated cleanliness inspection of optical fiber endface is a critical and challenging vision task that can benefit from deep-learning enabled microscopes. This new technology revolutionizes the traditional ...

FiBO™ 250 interferometer is a fully automated solution for fast accurate fiber optic connector endface testing. 3D surface metrology and advanced defect detection capabilities are combined in compact ...

Dimension can provide a full range of fiber end-face inspection and cleaning solutions to effectively improve product quality and reliability. Dimension is committed to creating a series of optical fiber ...
