I need to make this cable longer so I can move the box under my house and bring it up elsewhere. Are there any ways I can do that, or cables I can use to extend it?

Transmit data over long distances while retaining signal power with fiber optic cables. This innovative material is efficient, safe and ergonomic.

A 10' retracted cord will extend to almost 10ft., a 16' cord to approximately 16ft., and our 23' retracted cord will extend to over 22ft., with 6' straight ends cut blunt for custom

Extron Fiber Optic Extenders enable long haul transmission of AV and RS-232 control signals or USB over fiber optic cable at extreme distances.

Yes, fibre optic cables can be extended by using splice closures or optical connectors to join multiple cables together. This allows for longer distances to be covered without loss of signal quality.

These specially formed cables expand to their full working length, permit both horizontal and vertical movement and retract to minimum working length as needed. They ensure flexibility, neatness, ...
