

Fiberglass rigid tail luminous filter with three thickened lenses

The synthetic rigid cell is an extended surface, medium to high efficiency filter. The high lofted ultrafine synthetic media provides excellent dust holding capacity and ...

The high lofted ultrafine fiberglass media provides excellent dust holding capacity and coupled with its rigid construction virtually eliminates dust particle unloading downstream of the filter. Filter is suitable ...

Choose from our selection of fiberglass filters in a wide range of styles and sizes. Same and Next Day Delivery.

The Rigid Cell Filter is an extended surface medium and high efficiency rigid air filter. These are available in MERV 11, MERV 13, and MERV 15 in both synthetic and fiberglass.

The result is a rigid, stable filter with consistent performance under a variety of operating conditions. Available in three efficiency ranges, MERV 11, MERV 13, and MERV 14, it is designed for use in a ...

Used in both side access and built-up filter bank Replaces traditional pocket filters where rigid format prevents unloading in variable air volume systems Can be used as a pre-filter for higher efficiency ...

Get free shipping on qualified Fiberglass Air Filters products or Buy Online Pick Up in Store today in the Heating, Venting & Cooling Department.

The Aerostar [®]; Fiberglass Rigid Cell is an extended surface, medium to high efficiency filter. The high lofted ultrafine fiberglass media provides excellent dust holding capacity and coupled with its rigid ...

The fiberglass option is the Tri-Cell R, which features a high loft, depth loading micro-glass media. Tri-Cell R delivers strong mechanical filtration and proven removal efficiencies throughout its services life.

Glasfloss Z-Pak air filters are designed for medium and high-efficiency applications and offer superior service life. The Z-Pak's total rigid construction makes it ideal for variable air volume systems (VAV), ...

Rigid cell air filters, also known as box air filters, are deeper than pleated panel filters and feature sturdier frames. Their rigid frames withstand airflow fluctuations, making them ideal for variable ...

The filter media shall be continuously bonded to a heavy-duty, 28-gauge, corrosion-resistant, electrogalvanized steel, expanded metal grid with an open face area of not less than 95%.
