

The CRS804 DDQ is a compact and reliable 400 Gigabit switch designed for modern AI workloads and next-generation network upgrades. With four 400G QSFP-DD ports and dual 1/10G Ethernet, it ...

FS 400G data center switches offer high speeds and port densities to meet the network deployment requirements of various scenarios and the evolving requirements of next-generation data center ...

Empower AI data centers with 400G & 800G ethernet switches from Cisco Nexus, Huawei & Arista. All models are available from our global stock. Talk to our experts.

Experience breakthrough switch performance that delivers high capacity, speed, and efficiency. A new modular chassis design supports high-port-density 400G expansion modules. Get a high ...

As data centers continue to evolve, the demand for higher bandwidth and faster network speeds will drive further advancements in the electronic components used in 400G/800G network switches.

The next-gen 400G Extreme 8730 switch delivers exceptional density, power efficiency, and flexible connectivity--ideal for high-performance enterprises, hyperscale cloud, and I/O-intensive environments.

For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive ...

Senao 400G high-speed network switch is designed for the TOR (Top-of-Rack) or spine switch in data centers. In response to the explosive growth of data, the 400G switch aims to meet the network ...

The Edgecore DCS520 is a high-performance spine switch for data centers, offering line-rate L2 and L3 switching across 64 x QSFP56-DD ports. It supports various configurations and can be deployed as ...

Key Features  
o Data Center Spine Switch  
o 64 x 400G QSFP-DD  
o 2 x 10G SFP+ port for data  
o 1 x RJ-45 console port  
o 1 x RJ-45 Out-of-Band (OOB) management port  
o 1 x USB port  
o x86 CPU support  
o ...
