

How to connect wires to a box-type electrical distribution box

In this video, we'll walk you through the process of wiring a home distribution box with a detailed connection diagram.

Use wire strippers to strip 3/4 inch (19 mm) of casing insulation off the end of every wire going into the junction box. Twist the exposed ends of the same-colored wires together with a pair of pliers. Use a wire nut to connect multiple wires and push them into the box before sealing it.

Connect the input and output wires to the corresponding terminals of the distribution box. Then press the wire onto the terminal with a wire stripper, or tighten the wire with screws.
