

# How to turn off the light from the fiber optic sensor

Dynamic Teach-In The Sensor enters a recording phase when the T1 key is pressed, and the minimum and maximum signal strength are saved to memory.

The document is an instruction manual for the RGB Digital Fiber Optic Sensor models CZ-V21A (P) and CZ-V22A (P), detailing their components, installation, and operation procedures.

With the release of the pushbutton, the yellow and red LED will turn OFF indicating a successful learn. If the yellow LED turns OFF, but the red LED turns ON then the learn was unsuccessful.

Because the fiber optic sensors use laser light which is intrinsically inert, the FD340 Series system can be installed safely at chemical or ammunition depots, or any location where the use of electricity is a ...

If the received light intensity does not display "0" due to the background when no object to detect is present, this function can be used to shift the received light intensity to "0".

Connect brown wire and blue wire to DC 24 V switching power supply. Now let's, see how we will use the sensor? Here is the LED Bar which varies with sensing range and shows the ...

Press the MODE button once and use the manual button until "init" is shown in the current display. Press the MODE button once. The current display should read "ok" and then be replaced by ...

Visually align the sensor (or fiber-optic cable) on the reflector until the green output status indicator turns on (with Light-operate mode) or turns off (with Dark-operate mode).

With diffuse reflective models, light is emitted and the target is used to reflect light back to the sensor. The transmitter and receiver or housed together, eliminating the need for a separate receiver or ...

First, put the detected object in the farthest place, LED displays the received light intensity 0, press SET key. Then move the detected object to the place close to the transmitter. When LED displays the ...

Sensor Setting Guide available in all major Asian and European languages. An essential support tool for personnel configuring sensors in any country.
