

The Huawei CloudEngine S8700 Series sets a new standard for modular core switching--featuring up to 16Tbps throughput, full MACsec encryption, integrated VXLAN gateway, ...

The Huawei core switch isn't a luxury--it's a strategic reset. By centralizing intelligence, it cuts through the complexity of hybrid clouds, IoT sprawl, and shadow IT.

CloudEngine S12700H series switches are Huawei's next-generation modular core/aggregation switches designed for high-end campus networks in the all-wireless era of Wi-Fi 6/7. CloudEngine S12700H ...

With multiple industry-leading intellectual properties and patents, Huawei provides more than a hundred switch models in more than 10 series, including access, aggregation, and core switching.

These make CloudEngine S6750-S series switches the ideal core or aggregation switches on a cloud campus network to facilitate digital transformation of global customers.

Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, ...

Huawei CloudEngine S5755-H series switches are high-quality gigabit access switches that provide 24 or 48 10/100/1000BASE-T downlink ports, four 25GE plus two 100GE uplink ports, and expansion ...

One switch can be virtualized into a maximum of eight logical switches, allowing one core switch to manage the services of different areas (such as the production area, office area and Internet DMZ) or ...

Why Is the Huawei CloudEngine 12800 Core Switch a Game-Changer? The answer lies in its ability to tackle three universal pain points: bandwidth bottlenecks, latency issues, and security ...

? The switch provides high scalability and supports smooth bandwidth expansion, smooth port rate upgrade, and compatibility with cards on the live network to protect investments.
