

Introduces basic principles and application scenarios of the wired and wireless convergence solution. For more information about Wireless network: <https://info...>

Thunder link offers various models of Huawei Ethernet switches and network switches, including the S5720, S6720, S6730, CE6800 and CE12800, designed for data centers and campus networks. ...

Configure the IP addresses of interfaces and the IS-IS route-policy on each switch. Configure BFD sessions on SwitchA and SwitchB to improve the link fault detection speed of the switches. Set the ...

The S7700 series provide service optimization features like wired and wireless convergence, unified user management, quality awareness (iPCA), H-QoS, and unified security.

You can set different convergence priorities for routes: critical, high, medium, and low (in descending order of priority). The system then converges routes according to the assigned scheduling weight to ...

Managing 1024 wireless APs, the switch converges wireless and wired policy management for the Wi-Fi 6 era, avoiding the forwarding performance bottlenecks of standalone WLAN ACs.

Huawei CloudEngine S6730-H series switches are next-generation core and aggregation switches that provide high performance, reliability, and intelligent ...

The document provides configuration instructions and commands for basic switch configuration using Huawei switches. It covers topics such as changing the ...

Based on Huawei's unified software platform and powered by high-performance programmable chips, the switches support advanced features such as application identification, VxLAN, SRv6, network ...

On an IPv4 network, configuring BFD for IPv4 static routes on the public network can speed up route convergence and improve network reliability. 1.6 Configuration ...

On an IPv4 network, configuring BFD for IPv4 static routes on the public network can speed up route convergence and improve network reliability. 1.6 Configuration Examples This section provides ...
