

iDC iPDU-M Series The iPDU-M series rack iPDU is designed for small and medium-sized datacenters. It offers reliable power distribution and metering at the inlet level and support environmental sensors ...

The Intelligent Micro Module combines sensor and Big Data analysis techniques, and changes traditional fault maintenance into failure prediction and proactive maintenance.

Xensure is a new generation of modular data center solution that integrates power supply, power distribution, cooling, cabinet, channel closure, integrated cabling, intelligent ...

Besides, 7 sets of dual-row cold aisle micro-modules are used in the project, including cold aisle deployment, hundreds of server cabinets, PDUs, and supporting front cabinets, power ...

Full-colored PDU options provide visual control of power feeds and easy identification. Imagine being able to tell a technician that the Blue PDUs are the ones they need to focus on. And, colored secure ...

Each iDC Mpower Pro UPS module has a complete functional 25kW UPS, advanced wireless parallel control technology and smart communication protocols supporting online maintenance without ...

Xensure is a new generation of modular data center solution that ...

Each module can operate on its own and can be assembled in an independent and complete IDC space. It's a highly innovative micro-module IDC with the advantages of being advanced, energy-efficient, ...

Highly integrated and flexible installed data center infrastructure for rapid deployment and efficient operation and maintenance. Inspur intelligent micro module product adopt factory prefabrication ...

iDC iPDU-MC Series The iPDU-MC series rack iPDU is designed to suit the operational requirements of next-generation datacenters. iPDU-MC Series is a sustainable, upgradeable and maintainable iPDU ...

This initiative encompasses pivotal systems, including micro - module integrated intelligent data rooms, power environment monitoring, and intelligent power distribution.
