

Iran's energy sector stands at a critical juncture. Without immediate and effective reforms, the nation faces a future of worsening energy shortages, ...

Stay on top of Iran latest developments on the ground with Al Jazeera's fact-based news, exclusive video footage, photos and updated maps.

Iran's more than 300 sunny days a year provide ample opportunity for the growth of solar energy and demonstrate the country's deep potential for developing renewable energy. But progress ...

A top oil and gas producer in West Texas' booming Permian Basin declared a "green" light for the reluctant U.S. energy sector to start churning out more volumes amid the ongoing Iran war and...

Iran is uniquely positioned to harness its abundant natural resources and transition toward a more sustainable energy future. With over 300 sunny days a year, the country is ideally ...

Governments across Asia are ramping up their use of coal, the dirtiest fossil fuel, as they try to cover huge energy shortfalls triggered by the US-Israel war on Iran.

Now, the Iran war and its costly energy crunch have some experts wondering if selfishness and nationalism may be a more likely way to save the planet, by boosting support for homegrown ...

Iran's energy sector stands at a critical juncture. Without immediate and effective reforms, the nation faces a future of worsening energy shortages, escalating fiscal deficits, and environmental ...

Some US refineries have adapted to refine the country's light, home-grown oil, though it varies by region and geography.

In light of this evidence, countries across the world are being urged to accelerate the transition from fossil fuels. But the Iran war may also make that more difficult.

Escalating military confrontation with Iran while touting energy affordability at home highlights Trump's policy contradiction, as heightened geopolitical risk tends to inject volatility into ...
