Chinese tech giant Huawei has officially handed over the completed National Fiber Backbone to LeoneCom, marking a major milestone in Sierra Leone's digital infrastructure expansion.

Leonecom is a technology company working a private partner with the government of Leone to oversee the national fiber optic backbone and ancillary infrastructure.

The study will facilitate the expansion of Africell's fiber backbone network nationwide and the complementary expansion of fixed broadband networks in up to 32 cities and towns.

Construction work on the second phase of Sierra Leone's national fiber optic network has started. They follow the receipt by the government on April 24 of the related technical equipment.
