

The system shall be capable of multivariable process control (MPC) within the controller layer. The system shall be capable of multivariable process control (MPC) at the application layer, offered by ...

Each summing box distributes excitation voltage to up to four load cells and transfers each load cell's performance characteristics and weight signals to the Hardy weighing instrument. Hardy has added a ...

Our passive sensor actuator boxes consist of plastic, standardised M8 and M12 plug-in slots, and a wide range of connection options for the trunk cable. You can choose between M23, M12, M16, a ...

The Fieldbus, IO-Link, and EtherCAT Box modules in IP67 protection allow use in harsh environmental conditions. With their compact and watertight design, they are suitable for direct installation in the ...

They ensure a reliable voltage conversion between process peripherals and higher level control systems. They provide electrical isolation for sensitive electronics such as PLCs and are also ...

View the TI Interconnect/distribution box block diagram, product recommendations, reference designs and start designing.

Murrelektronik's universal distribution boxes can collect up to four signals per port independently of each other. They are the right solution for applications that include analog signals.

This product is part of the PacDrive 3 range, an offer of distribution boxes for Lexium 62 ILM daisy chains. This distribution block features 1 input and 4 outputs. The distribution block with SERCOS III ...

Our IO distribution systems offer a powerful and reliable solution for the structured distribution of input and output signals in modern automation environments.

Learn the step-by-step process of customizing complete distribution boxes tailored to your needs. From requirement confirmation to design, production, and testing, find out how to get a ...
