

Intelligent Configuration Solution for Optical Isolators

intelligent definition: having high mental capacity or quick understanding. Check meanings, examples, usage tips, pronunciation, domains, and related words. Discover expressions like "intelligent ...

A person or animal that is intelligent has the ability to think, understand, and learn things quickly and well. Susan's a very bright and intelligent woman who knows her own mind. ...lively and intelligent ...

intelligent, clever, alert, quick-witted mean mentally keen or quick. intelligent stresses success in coping with new situations and solving problems.

In this paper, we propose a device functioning in Transverse Magneto-Optic Kerr Effect (TMOKE) configuration, where a magneto-optic material is sandwiched in between parallel dielectric ...

We specialize in high-performance isolators beyond the current state-of-the-art, utilizing our patented technologies. Many isolators are in volume production, offering an unmatched cost advantage. We ...

In this isolated multipoint transmission application circuit, two different optoisolators are utilized: HCPL-0721 and HCPL-061N. The benefits include low input drive current that maximizes LED ...

This approach combines evanescent-coupled silicon waveguides and the magneto-optical effect, resulting in a nonreciprocal propagation that can be optimized for optical isolation.

Here we demonstrate an integrated approach for passively isolating a continuous-wave laser using the intrinsically non-reciprocal Kerr nonlinearity in ring resonators.

In this work we experimentally demonstrate a compact EO isolator that brings transformative improvements to the chiral shunt design - significantly relaxing the phase matching, achieving multi ...

The ground loop can be broken by simply disconnecting the grounds, or by more sophisticated means: common-mode chokes, frequency selective grounding, differential amplifiers, and galvanic isolators.

Here, we describe the limitations of the most promising technologies as well as the issues we address towards a successful solution: A fs-laser-inscribed low-loss broadband integrated isolator operating ...

To mitigate micro-vibration disturbances in high-resolution optical satellites arising from the simultaneous operation of multiple reaction wheels, this study develops a novel intelligent variable ...

Intelligent Configuration Solution for Optical Isolators

Having or showing an alert mind or high intelligence; bright, perceptive, informed, clever, wise, etc. Showing sound judgment and rationality. An intelligent decision; an intelligent solution to the ...

INTELLIGENT definition: having good understanding or a high mental capacity; quick to comprehend, as persons or animals. See examples of intelligent used in a sentence.

Definition of intelligent adjective in Oxford Advanced Learner's Dictionary. Meaning, pronunciation, picture, example sentences, grammar, usage notes, synonyms and more.

Intelligent means smart, or having the ability to process and understand information (including dictionary definitions). Intelligent comes from a Latin word meaning "to understand, to gather," and intelligent ...
