

As a power distribution equipment company, we supply high-quality power distribution equipment including high-voltage distribution box, low voltage electrical distribution box, industrial power ...

1. Introduction and Application Model: WTYJ-PD Product positioning Intelligent distribution box monitoring instrument, supporting real-time electrical data collection, energy consumption ...

Solutions for smart low voltage electrical distribution Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are ...

Fully integrated high voltage distribution box with both positive and negative contactors. High voltage fuse, precharge system, and ...

Incorporating electronic sensing into the contactor provides the intelligence to monitor and respond to overcurrents quickly and accurately. In fact, these "smart" connectors provide at least twice the ...

The present invention provides an intelligent distribution box and a signal transmission method.

Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with ...

It is an intelligent product integrating data collection, communication, reactive power compensation, power grid parameter analysis, control and other functions required by the smart grid. The product ...

Intelligent power distribution box is composed of traditional leakage protector, air switch, AC contactor and KC868-H8.

Fully integrated high voltage distribution box with both positive and negative contactors. High voltage fuse, precharge system, and current sensor built in. Provisions for three HV accessories and fuses.

As an indispensable power control device in modern buildings and industrial facilities, the distribution box integrates core components (e.g., circuit breakers, contactors, intelligent protection ...
