

The SSE-T8164 comes with 64 OSFP 800G ports in a 2RU form factor to meet the leaf, spine and super spine datacenter architectures. The interfaces provide flexibility to meet a variety of speeds and use ...

This 800G to 800G interconnect solution adopts a point-to-point direct connection architecture, establishing a high-speed optical link between two 800G switches via NADDOD 800G OSFP optical ...

Discover 800G Ethernet technology and FS 800G AI switches, delivering ultra-high bandwidth, low latency, and lossless performance for AI/ML clusters, HPC, and cloud data centers.

Discover the explosive growth potential of the 800G switch market. This in-depth analysis reveals key drivers, trends, and challenges, projecting a robust CAGR and highlighting leading ...

Discover 800G Ethernet technology and FS 800G AI switches, delivering ultra-high bandwidth, low latency, and lossless performance for AI/ML ...

A next-generation, highest-capacity switch for data center spine use case. Breakout options include 2 x 400G, 4 x 200G, and 8 x 100G per port, with a maximum of 160 logical ports.

This report profiles key players in the global 800G Switch market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, ...

The S9321-64E OSFP is an 800G data center switch featuring 64 x 800GE ports, 51.2 Tbps capacity, and advanced traffic management, ideal for AI/ML workloads.

For the most demanding environments, the 800G routing and switching platforms provide flexibility and choice for large scale cloud, AI, leaf and spine, routing transformation and hyperscale IO intensive ...

DS4101 is a 32-port 800G switch in a 1U form factor that provides 25.6Tbps bandwidth, transforming connectivity for the future with unprecedented speed and agility.

1G-800G Whitebox Switches preloaded with Enterprise SONiC for Data Center, AIGC, RoCE, NVME Storage, Enterprise Campus PoE Access & NPB.
