

Laser diodes (LD) are semiconductor devices that convert electrical energy into high-power optical energy. These devices are currently used in the fields of telecommunications and ...

Laser diodes are semiconductor lasers with a current-carrying p-n junction as the gain medium. They are the most important type of electrically pumped lasers.

Laser diodes, which are capable of converting electrical current into light, are available from Lasertree with center wavelengths in the 375 - 2000nm range and output powers from 1.5 mW up to 3 W.

Get the best deals on Laser Diodes when you shop the largest online selection at eBay . Free shipping on many items | Browse your favorite brands | affordable prices.

Learn how wavelength, power, package & cavity type determine the cost of a laser diode Introduction: Semiconductor laser diodes range widely in price based on a few key parameters. The wavelength, ...

Shop DigiKey's large in-stock selection of Laser Diodes, Modules. View inventory, pricing and order now for same day shipping!

From standard commercial off-the-shelf components to completely Customized Laser Diode Solutions, tailored to your specifications from the wafer level, RPMC can deliver the right solution for your needs.

OSI Laser Diode manufactures advanced optoelectronics products designed for the telecommunications, data communications, broadband access, industrial, aerospace, test and measurement, medical and ...

Filter the laser diode list by wavelength, output power, and package type to meet your specific requirements. Contact us for more information about our laser diodes and services, including laser ...

635 or 650nm Laser Diode This is a red light laser diode with output wavelength at 650nm or 635nm. It has a high performance ...
