

A laser diode pigtail module package achieves the best coupling efficiency. A high-speed laser diode pigtail for wide-band fiber-optic communications is a key component in optical fiber user ...

These laser diodes have a one-meter single-mode fiber pigtail. All fiber ...

These laser diodes have a one-meter single-mode fiber pigtail. All fiber pigtails are terminated with FC/PC fiber optic connectors except LD-1310-31B with FC/APC. Each individual product is tested ...

Pigtailed Laser Diode Modules are available with VIS and NIR wavelengths ranging from 405 to 1550nm, with output powers ranging from 1 to 100mW. Their plug and play operation make these laser diodes ...

Packaged single-emitter diodes with high power and excellent reliability. Ideal for fiber amplifiers, laser pumping, material processing, and solid-state laser pumping applications. Customize your ...

Our high-quality MM pigtail alignment process for laser diodes includes multiple test and inspection points that ensure that the coupling efficiency is maximized.

It utilizes multi quantum well Fabry Perrot semiconductor laser structure and packaged in TO56 coaxial housing with fiber pigtail. It features a built-in power monitor photo diode and offers excellent stability ...

All devices are available in fiber pigtailed co-axial packages or in connector style receptacle packages. Pigtailed. Devices can be pigtailed with any size optical fiber that is compatible with its active area ...

ProPhotonix Fiber Pigtailed Laser packages come with a standard 1-meter fiber length and a range of termination options, including FC or SMA connectors, or unterminated fiber. The housing, available ...

Series of laser diodes. These units are available in ready-to-use, fiber-coupled packages, including FC, ST, and SC receptacles, as well as fiber- pigtailed units.

The 0.2-2mw 1310nm FP pigtailed laser diode module plug in type is provided in a coaxial plug-in package. It also uses a Fabry-Pérot cavity, which means it features a low threshold and operating ...
