

Currently, more than 300 vessels and shore locations are equipped with 2M/MTR stations, each consisting of a workbench, diagnostic equipment and a full suite of miniature/micro-miniature ...

Our family of mini modules provides electrical system designers with specific control functions for safer performance. All modules offer protection from rugged environments using fully encapsulated ...

Discover compact, high-definition camera modules perfect for DIY projects. Explore wireless options with motion detection for home security and surveillance.

The NanEyeM miniature camera modules have a high frame rate and a smooth, low-delay display over a wide range of standard interfaces. These modules include a 10-bit ADC and a ...

NanEyeM is a miniature sized image sensor for vision applications where size is a critical factor. The ability of the camera head to drive a signal through long cables ...

Our line of easy-to-build, high-performance mini-module kits are inexpensive, ideal for first-time builders, and will serve many useful functions in your shack and at your electronics workbench. They can be ...

With increased computing power in a smaller package, the MiniMRP is the next generation of electronics packaging and avionics hardware, putting ever-increasing computing power into 40% smaller ...

Grayhill offers standard, mini, and G5 sized digital I/O modules, compatible with its industrial control and data acquisition products. Our line of pluggable input and output modules provide a versatile method ...

NanEyeM is a miniature sized image sensor for vision applications where size is a critical factor. The ability of the camera head to drive a signal through long cables makes this the ideal component for ...

36A INTRODUCTION The Miniature Module is a small form factor solution for mounting avionics. The solution enables quick and easy installation and replacement of Line Replaceable Units (LRUs) in the ...
