

Developed with Hidrobarsan's extensive mining expertise, the 6000M Bridge Wire Saw simplifies tasks and delivers high cutting performance with its numerous features.

Discover our high-quality stone machinery, including diamond wire saws and bridge saw cutting machines. We provide top-notch equipment for efficient and precise stone processing.

The machine can be used for cutting bridge, support beam of building and for splitting small stone blocks. First, wrap the machine with plastic film. Second, pack the machine into the ...

Modern diamond wire saw machines replace traditional blasting methods with precision cutting technology, reducing material waste by up to 40% while maintaining structural integrity of natural ...

Our Quarry Wire Saw Machine utilizes a continuous loop of diamond-beaded wire driven by a massive, variable-frequency drive (VFD) flywheel. It can execute horizontal, vertical, and diagonal cuts through ...

Diamond Wire Automatic Cut Stone Mining Saw Cutter Machine for Granite/Marble/Block/Quarry/Bridge/Concrete Cutting Trimming Squaring Profiling

The machine can be used for cutting bridge, support beam of building and for splitting small stone blocks. First, wrap the machine with plastic film. ...

We offer High quality Marble Bridge Saws, Granite Bridge Saw and Water Jet Machines at very affordable prices. Find a wide range of bridge saw models at our warehouse that offer optimum ...

Hydraulic Diamond Wire Saw Machine is used to cut concrete, granite, rock, walls and beams in construction of bridges, roads and tunnels. It is necessary for cutting and removing reinforced ...

See how Mactech used a 30-inch diamond wire saw to cut 106 reinforced concrete bridge piles... fast, clean, and just above the mud line.

The core technology behind the quarry diamond wire saw lies in its design--a thin, flexible wire embedded with synthetic diamonds. These diamond particles act as cutting tools, allowing the saw to ...
