

Mobile Optical Distribution Box Installation and Testing Process

The present document is mainly applicable to the intelligent optical distribution network in access network. It can also be used as a reference for other networks with optical fibre connections.

Welcome to the Opticomm preparation and installation guide. This document will help you to correctly prepare your premises and arrange connections to access the Opticomm network.

Only qualified persons familiar with the design, installation and testing of fiber optic cabling should perform the work described in this publication. Installation technicians should be trained and certified ...

You'll need an ODF rack, some installation tools such as a Wrench, sleeve, and screwdriver, fiber optic cleaning supplies such as alcohol wipes and non-woven fabrics, patch cord ...

Try to complete the installation in one pull. Prior to any installation, assess the route carefully to determine the methods of installation and obstacles likely to be encountered.

The installation of an optical fiber distribution box is a multi-step process, and the following is a detailed installation guide:

View and Download ATC ODB-48/OSB installation manual online. Optical Distribution Box / Optical Splitter Box. ODB-48/OSB network hardware pdf manual download. Also for: Odb-48.

These have summaries of key information for your people and contractors when they're laying ducts, building joint boxes, and installing internal wiring and Openreach equipment.

For buildings with mobile-service rooms fibre optic cables must be provided by the building developer. The exact fibre topology between the mobile-service rooms will depend on the room distribution option.

The user will prepare the location for installation, remove any components in the desired space (example a cross frame routing tray) and install the hardware. Refer to sections 3 through 5 of this ...
