

Modular Data Center Cold Aisle 1200mm Depth Manufacturer

Explore Tate's modular containment solutions for data centers, including hot and cold aisle systems, hard roofs, doors, and custom partitions designed to improve cooling efficiency and reduce energy loss.

Rittal's new aisle containment line solves these problems with a modular, standards-based design that integrates easily with existing racks, cabling, HVAC, and safety systems.

The in-rack cooling system uses a backward centrifugal fan and the dash of the centrifugal fan is inside the cold aisle. The horizontal air flow is used to reduce resistance and shorten the distance of the ...

Our modular systems provide flexible, secure separation between hot and cold aisles or controlled zones to maintain optimal environmental performance.

Cost-effective, customized hot and cold aisle containment solutions can not only keep your data center running efficiently, they can help your build-out be more efficient, too.

AisleLok ® Modular Walls are an ideal solution for creating separation between hot aisles, cold aisles, and other areas of a data center to help contain and manage airflow.

Cool Shield is an industry-leading aisle containment system solutions company. Our experts are ready to customize a solution to fit your data center today!

Following a collaborative, customer-driven approach, we provide the best containment options for each project. Whether ceiling hung or integrated with aisle structure, our containment solutions are ...

With CONTEG Contained Aisle solution, the modular containment system is used to physically separate cooled air from hot exhaust by forming a cold plenum space and preventing mixing of hot and cold ...

Our innovative, modular containment designs adapt to your installation in order to maximize energy efficiency while creating a predictable operating environment that increases equipment reliability.
