

Different connectors and splice termination procedures are used for singlemode and multimode connectors, so make sure you know what the fiber will be before you specify connectors or splices!

We offer customized pre-termination for your fiber cables, catering to your specific needs. Choose from a diverse range of connector types, including SC, ST, FC, MTRJ, and MPO/ MTP, LC connectors.

Eliminate time-consuming, labor-intensive field termination with pre-terminated fiber assemblies. Our fiber assemblies reduce the time and cost associated with on-site cable breakout and connector ...

Get the performance and reliability you need with our Pre-Terminated Armored Multimode Fiber Optic Cables. Featuring multimode fiber, LC connectors, and pre-terminated for easy installation.

What is a Pre-Terminated Fiber Cable? A pre-terminated fiber cable is a fiber optic cable delivered with factory-installed connectors--such as SC, LC, or MPO--eliminating the need for on ...

Used to interconnect panels or cassettes, the small diameter MicroCore™ cable construction reduces the required pathway space and provides a flexible outer jacket in both single-mode and multimode ...

Multimode uses a 50/125-micron core. Plenum jackets are safe for fires. Loss is low at 850 nm wavelength. Connectors can be LC, SC, also ST. A tight buffer guards the fibers inside. Wavelengths ...

Save time during on-site installations by ordering pre-terminated fiber optic cable from Discount Low Voltage. Choose from a variety of singlemode and multimode fiber cables as well as video snake ...

Pre-terminated fiber optic trunk cables and harnesses, plus multimode, single-mode, and pigtail assemblies are all made to customer specifications. Choose cable type, connector combinations, ...

Megladon supports data center and building level fiber deployments with Multimode (MM) Trunk Cables. By pre-terminating MM fiber trunks with the HLC™ process, we create the highest quality backbone ...
