The LEAP[®] On-Board Transceiver is a rugged 12-channel duplex optical transceiver capable of running data-rates of up to 16Gbps per channel (192Gbps cumulative) on multi-mode fiber.

By having these test devices in-house, it guarantees 100% compatibility and reliability in all of today's most popular network platforms. All ENET transceivers are backed by an industry-leading lifetime ...

NEC has been developing and manufacturing optical transceivers for more than 30 years since the dawn of the optical communications era. Based on this extensive experience, we provide high-reliability ...

The packaged device contains a plasmonic modulator using electro-optic polymer material and platform chips have demonstrated 400 Gbps, which is the current specification that datacenters are looking ...

These relationships with leading hyperscalers, OEMs, ODMs and optical module manufacturers give us insight and extensive visibility into product designs, design specifications, ...

Download PDF. This document has been deprecated, for more information refer to Interconnect Product Specifications or contact your NVIDIA representative at Enterprise Support ...

The JQ-LW100-LR4I QSFP28 module provides 100GBase-LR4 throughput up to 10km over a standard pair of single mode fiber (SMF) with duplex LC connectors. This transceiver is compliant with IEEE ...

This innovative solution enables more simplified and reliable edge and data center networks aligned with a standards-based ecosystem and can help eliminate separate full-function optical transceiver boxes, ...

Handling all storage, data, voice and video traffic, our optical transceivers can be applied in various networks. We have a sufficient stock of generally compatible transceivers that are cost-effective and ...
