

This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status ...

These maps reveal how data flows between countries, highlight strategic connectivity hubs, and expose regional digital divides. Governments, businesses, and engineers use fiber maps to plan expansions, ...

As the demand for high-speed internet and bandwidth-intensive applications grows, countries worldwide are accelerating their fiber optic ...

OverviewDescriptionSegments and landing pointsDisruptionsGCHQ interceptionSee alsoFibre-optic Link Around the Globe (FLAG) is a 28,000-kilometre-long (17,398 mi; 15,119 nmi) fibre optic mostly-submarine communications cable that connects the United Kingdom, Japan, India, and many places in between. The cable is operated by Global Cloud Xchange, a subsidiary of RCOM. The system runs from the eastern coast of North America to Japan. Its Europe-Asia segment was the fourth longest cable in the world in 2008.

As the demand for high-speed internet and bandwidth-intensive applications grows, countries worldwide are accelerating their fiber optic deployment to meet these needs. This blog ...

Open map of the world's electricity, telecoms, oil, and gas infrastructure, using data from OpenStreetMap.

Fiber optic cable market has emerged as vital part of the worldwide telecommunications and data transmission system. The fibre optic cables that carry the data by the use of light signals ...

TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations.

Countries with significant demand for fiber optic cables are typically those experiencing rapid network infrastructure development, high population density, and strong investments in ...

This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time.

Fibre-optic Link Around the Globe (FLAG) is a 28,000-kilometre-long (17,398 mi; 15,119 nmi) fibre optic mostly- submarine communications cable that connects the United Kingdom, Japan, India, and many ...
