

Nigerian Data Center Intelligent Cold Aisle Construction Case

Schneider Electric has released new insights on how the rapid adoption of artificial intelligence is transforming data centers requirements across Nigeria, urging operators, ...

High-fidelity CFD is key for robust and efficient urban edge data center design. This study examines the cooling performance of edge data centers deployed in urban environments, where ...

AI-driven cooling management systems are revolutionizing data centre operations. By analyzing real-time data, AI can optimize cooling performance, adjust airflow, and predict ...

As artificial intelligence workloads multiply across the continent, the conventional cooling systems underpinning most facilities are buckling under thermal loads they were never engineered to ...

Considering the poor quality of the local power grid, limited project time, and the difficulty of on-site construction, the company choose to deploy Kstar IDB pre-assembled, pre-configured ...

Schneider Electric said the rapid adoption of artificial intelligence (AI) is transforming data centres requirements across Nigeria, urging stakeholders to redesign infrastructure for...

Case studies from South Africa, Kenya, and Nigeria demonstrate how data centers have bridged the digital divide, created job opportunities, and enhanced connectivity.

Rack Centre is planning to build a 12MW data center in the Ikeja area of Lagos, Nigeria. The company announced the planned construction at a recent media parley and data center tour of ...

Creating AI-ready data centre capacity for Nigeria with Rack Centre A landmark project reshaping the digital landscape in West Africa. With an additional 12MW capacity, this state-of-the-art facility is the ...

The Nigerian market for Cold Aisle Containment (CAC) systems is at a pivotal juncture, transitioning from a nascent, import-reliant segment to a strategically vital component of the nation's ...
