

The system is FM Global approved and meets ASTM E -1725 "Fire Tests of Fire Resistive Barrier Systems for Electrical System Components" requiring the highest level of performance for trays with ...

With more than 20 years of experience in the industry, we can provide one of the market's highest quality products that are also easy and quick to install. We have developed every single detail so that ...

Among its wide range of solutions is a certified cable tray fire protection system. JetBlack® has developed a blanket system that can be fitted around cable trays and protects them in temperatures ...

The cable channel protects the cables from bumps and thus the cables do not collect dust on the floor or hang vaguely on the wall. The product packages includes installation instructions and mounting ...

Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings.

How do cable trays perform in fire conditions? To uncover the answer to this question, we have conducted tests on cable tray systems in different materials.

Build fire-rated enclosures around tray runs, transitions, and penetrations to block flame and smoke movement. Integrate coverings with existing fireproofing and firestopping systems for full compliance ...

Eagle Basket is a welded wire mesh cable management system offering zero hardware connection of straight lengths. The 2" x 4" mesh allows for continuous airflow to prevent heat, dust, and ...

The mostly combustible cable sheaths and insulation allow a fire to spread along the cable at rapid speed. Our tested solutions for cable fire protection can delay the spread of fire in order to minimise ...

Engineered for continuous monitoring and early warning, our cable-based detection system is ideal for protecting cable trays--whether single-tier, multi-tier, or densely packed.
