

OSI Laser Diode is a US-based company that was founded in 1967. The company is a manufacturer and designer of advanced optoelectronic components and solutions. The company's products include ...

These 1550 nm high-brightness pulsed laser diodes are well suited to most range finding applications requiring "eye safe" operation. This series is RoHS compliant.

About OSI Laser Diode Manufacturer of advanced optoelectronic products while supplying into the test/measurement, defense, and commercial/industrial, and medical markets. Products include ...

OSI Laser Diode, a provider of optical emitters and receiver modules, is featured on GoPhotonics for its range of laser diodes, LEDs, fiber optic transmitters, photodiode modules, and ...

Our comprehensive GaAs, InP-based III-V semiconductor laser diode design and manufacturing capabilities offer complete solutions where quality and reliability are paramount for aerospace and ...

Our Company OSI Laser Diode, Inc. (LDI), founded in 1967, produces advanced optoelectronic products of the highest quality for a broad range of applications and industries.

As one of the largest manufacturers of standard and customer photodiodes and optical sensors in the United States, we leverage over 50 Years of success to deliver excellent manufacturing and ...

OSI Laser Diode Inc. produces advanced optoelectronic products of the highest quality for a broad range of applications and industries. OSI Laser Diode Inc.- Leadership, Dependability and Integrity. The ...

OSI Laser Diode manufactures advanced optoelectronics products designed for the telecommunications, data communications, broadband access, industrial, aerospace, test and measurement, medical and ...

OSI Laser Diode Inc., produces advanced optoelectronic products of the highest quality for the telecommunications, data communications, broadband access, industrial, aerospace, test and...
